

Tracking App Ideas

Title: Daily Tracking App - Daily Use Storyboard

Summary: This document outlines the full UX storyboard for the Daily Use section of the Daily Tracking App. It covers the daily dashboard layout, non-daily event modal, and sub-page mini-report behavior, ensuring a smooth, optional, and empowering daily tracking experience.

1. Daily Dashboard

Background Layer:

- Full-screen subtle wavy animated background (like onboarding)
- Light gradient colors: blue (#2C7BE5) and teal (#00BFA5) at low opacity
- Gentle, slow animation movement

Foreground Content:

Top Section: Mood

- Today's Date: Centered, small font (Inter, 16px, #757575)
- Mood Input Card: White card, soft shadow, border radius 12px
 - Label: "How are you feeling today?" (Poppins Semi-Bold, 18px)
 - Mood Slider (1-10) or Segmented Mood Inputs (Morning, Afternoon, Evening)

Middle Section: Daily Trackables

- Title: "Today's Trackables" (Poppins Semi-Bold, 18px)
- Divider Line: light gray (#E0E0E0)
- Checklist of Trackables: Each TrackableCard with appropriate input (checkbox, number, etc.)

Non-Daily Events Section: Add Extras

- Title: "Add Extra Activities"
- Add Event Button: Pill-shaped, primary color (#2C7BE5), floating under section

Lower Section: Quick Notes

- Title: "Quick Notes"
- Notes Input Field: Multiline text input, white background, border #E0E0E0, rounded corners, placeholder text

Bottom Section: Submit

- Submit Button: [Submit Today's Report], full width or 80% centered, primary color background (#2C7BE5), white text, rounded corners (8px radius)

Spacing and Layout:

- Section spacing: 24px vertical
- Buttons generous padding: 32px+
- Mood input slightly sticky if possible

2. Non-daily event

Modal Structure:

- Slides up (~85% screen height), background dims, rounded top corners (24px)

Top Bar:

- Search Bar: Full width, placeholder "Search activities...", search icon inside, cancel ("X") button on right

Content Section:

Default View (Before Typing):

- Title: "Your Frequent Trackables"
- Grid/List of Frequent Items: TrackableCards with icon + name

Search Results View:

- Filtered List of Matches
- If No Results:
 - Text: "No matches found."
 - [Create New Trackable] Button

Behavior:

- Tap Trackable: Instantly add to today's report
- Tap Create: Opens "Create New Trackable" flow
- Close Modal: Returns to Dashboard

Spacing and Layout:

- Top padding: 16px
- Section spacing: 8px between items

3. Sub-page flow

Trigger Behavior:

- Tap Trackable with Sub-Page: Mini-Report Modal opens (~85-90% screen height), rounded corners, dim background

Mini-Report Modal Structure:

Top Bar:

- Title: Activity name (Poppins Semi-Bold, 20px)
- Close Button: "X" at top right

Fields Section:

- Instruction Text: "Optional details you can track"
- List of Optional Inputs: Dynamically pulled from `fields_json`, appropriate input types (text, number, picker)

Bottom Action Buttons:

- [Save and Add] Button: Saves filled/partial/blank fields
- [Skip] Button: Skips filling, adds main activity

Behavior Details:

- Save Partial: Allowed
- Submit Empty: Allowed
- Skip: Adds main Trackable only

Spacing and Layout:

- Title top margin: 24px
- Instruction Text margin: 8px
- Field spacing: 16px

- Bottom safe padding: 32px

4. Additional notes

Enhancements:

- Subtle parallax for background (optional)
- Mini-label on dashboard for detailed Trackables (future polish)
- Future features: Recent search history, trending suggestions, inline create shortcut

Behavioral Notes:

- Instant add behavior for speed
- Soft skip allowed to avoid blocking the user
