

Tracking App Ideas

Title: Daily Tracking App - Onboarding UX Storyboard

Summary: This document outlines the complete onboarding flow for the Daily Tracking App, designed to guide new users from first launch to an active, customized dashboard. It includes detailed descriptions of each onboarding screen, purpose, layout, and interaction notes, all in the updated visual style defined in the 2025 visual style guide.

1. Welcome Screen — "Get Started"

Element	Purpose
App Name at Top ("MyHabits")	Branding soft exposure
Wavy animated background	Calming, welcoming vibe across onboarding
[Get Started] Primary Button	Entry point to onboarding flow

UI Description:

- Full-screen animated wavy background in calming gradient
 - App name centered, using Poppins font (Semi-Bold, 28px)
 - Pill-shaped [Get Started] button centered near bottom
 - Teal button (#00BFA5), white bold text
-

2. Pick Daily Habits

Element	Purpose
Title ("Pick Your Daily Habits")	Sets task focus
List of Habit Buttons	User selects common daily habits
[More Habits] Button	Expand additional options
[Next] Button	Move forward in onboarding

UI Description:

- Bold title at top center
- Grid or vertical scroll of habit cards (rounded, elevated)
- Each card: white background, dark icons, clear text
- [More Habits] as pill-outline button
- [Next] pill-shaped primary button bottom right

3. Create Custom Trackables (Optional)

Element	Purpose
---------	---------

Title ("Create Something to Track")	Introduce customization
Name Input Field	Free-type field, styled per input standards
Type Selector Dropdown	Select tracking format
Add Sub-Page Toggle	Add optional mini-report
[Submit] / [Skip] Buttons	Confirm or bypass creation

UI Description:

- Clean white card with rounded corners (radius 16px)
- Inputs follow input field style: 1px border, subtle shadow
- Teal [Submit] button below form
- Transparent bordered [Skip] button last

4. Set Mood Tracking Style

Element	Purpose
Title ("How Often Do You Want to Track Mood?")	Mood frequency

[Daily] / [Multiple Times a Day] Buttons

Selection cards

Explanation Text

Describes differences in options

UI Description:

- Large cards with icons and titles
 - Selected card: subtle background fill and teal border
 - Center-aligned, spacious layout
 - Poppins for headings, Inter for descriptions
-

5. (Optional) Confirmation Screen

Element

Purpose

Setup Summary

Display user's choices

**[Start Tracking!]
Button**

**Complete
onboarding**

UI Description:

- Centered celebratory checkmark or subtle icon
- Summary text: "You're all set!"

- **Bullet-style recap: Mood style, habits selected, custom items**
 - **Primary teal [Start Tracking!] button at bottom center**
-

6. Starting Dashboard

Element	Purpose
Today's Date	Centered orientation
Mood Slider/Input	First mood entry
Habit Checklist	Daily habits
[+ Add Event] Button	Add non-daily activities
Notes Input	Free-form notes
[Submit Report] Button	Finalize report

UI Description:

- **Wavy animated background persists**
- **Mood block styled as elevated card: segmented buttons + slider**

- Habit cards: white, rounded, minimalist icons and checkboxes
 - Teal [+ Add Event] floating button
 - Notes field with placeholder and rounded corners
 - [Submit Report] button full-width pill at bottom
-

UX Flowchart Summary

- flowchart TD
 - A(Welcome Screen - Get Started) --> B(Pick Daily Habits)
 - B --> C(Create Custom Trackables)
 - C --> D(Set Mood Tracking Style)
 - D --> E(Optional Confirmation)
 - E --> F(Start Dashboard)
-

Implementation Notes

- Allow skipping habit selection and custom trackables
- Persist subtle animated wavy background
- Maintain visual consistency: pill buttons, round cards, soft shadows
- Use primary and accent colors consistently (#2C7BE5, #00BFA5)
- Save user progress per screen to enable mid-onboarding resume
- Load screens quickly to maintain fluid onboarding experience
