

## Title: Daily Tracking App - Onboarding UX Storyboard

**Summary:** This document outlines the complete onboarding flow for the Daily Tracking App, designed to guide new users from first launch to an active, customized dashboard. It includes detailed descriptions of each onboarding screen, purpose, layout, and interaction notes.

# 1. Welcome Screen — "Get Started"

Element	Purpose
App Name at Top ("MyHabits")	Branding soft exposure
Wavy animated or static background (persisting across onboarding)	Create calming, welcoming vibe across all onboarding steps
[Get Started] Primary Button	Entry point to onboarding flow

#### UI Description:

- Centered app logo or name at the top.
  - Full screen animated wavy background.
  - Center screen: large, pill-shaped [Get Started] button with bold font.
  - Button positioned just above the bottom third of the screen.
- 

# 2. Pick Daily Habits

Element	Purpose
Title ("Pick Your Daily Habits")	Sets task focus

<b>List of Common Habit Buttons</b>	Users can tap to select/deselect habits
<b>[More Habits] Button</b>	Expand additional predefined habits
<b>[Next] Button</b>	Proceed once selections made

**UI Description:**

- Title text centered at top, large and bold.
  - Scrollable grid or vertical list of habit cards (rounded, slightly elevated buttons).
  - Each habit card shows an icon and habit name.
  - [More Habits] button at bottom or sticky.
  - [Next] button floating at bottom right corner.
- 

### 3. Create Custom Trackables (Optional)

Element	Purpose
Title ("Create Something to Track")	Introduce optional deeper customization
Name Input Field	Free-type + autocomplete templates

Type Selector Dropdown	Choose input type: boolean, number, time, text, multi-select
Option to Add Sub-Page	Build mini-reports easily
[Submit] and [Skip/Next] Buttons	Allow save or skip flexibility

#### UI Description:

- Title text at top, centered.
  - Standard text input for Name field.
  - Dropdown picker for Trackable Type.
  - Optional Sub-Page setup toggle.
  - [Submit] primary button below form.
  - [Skip] secondary button at bottom.
- 

## 4. Set Mood Tracking Style

Element	Purpose
Title ("How Often Do You Want to Track Mood?")	Prompt user for mood granularity
Two Large Buttons	[Daily] or [Multiple Times a Day]

**Short Explanation Below Options**

**Clear difference between tracking styles**

**UI Description:**

- **Title centered, bold.**
  - **Two large cards or buttons, side-by-side or stacked vertically.**
  - **Cards contain short titles and icons.**
  - **Small paragraph under buttons explaining the impact of the choice.**
  - **Selected option highlighted with colored border or background.**
- 

## 5. (Optional) Confirmation Screen

Element	Purpose
<b>Summary of Setup</b>	<b>Mood Tracking Choice, Number of Habits, Custom Items Created</b>

<b>[Start Tracking!]</b>	<b>Move to Dashboard cleanly</b>
<b>Button</b>	

**UI Description:**

- **Checkmark or small celebratory graphic at the top.**
- **Brief text summary: "You're all set!"**
- **Bulleted highlights of their setup (Mood Style, # Habits, Custom Trackables).**

- Large [Start Tracking!] button centered at bottom.
- 

## 6. Starting Dashboard

Element	Purpose
Today's Date at Top Center	Orientation
Mood Slider/Input	Immediate first mood entry
Habit Checklist	Familiar habits displayed
[+ Add Event] Button	Add non-daily activities
Notes Text Input	Optional reflections

### UI Description:

- Date text at top, medium size.
- MoodSlider component directly under date.
- FlatList of TrackableCards for daily habits.
- Floating [+ Add Event] button lower right.

- Quick notes TextInput at bottom above submit.
  - [Submit Report] primary button below notes.
- 

## UX Flowchart Summary

- flowchart TD
  - A(Welcome Screen - Get Started) --> B(Pick Daily Habits)
  - B --> C(Create Custom Trackables)
  - C --> D(Set Mood Tracking Style)
  - D --> E(Optional Confirmation)
  - E --> F(Start Dashboard)
- 

## Implementation Notes

- Allow users to skip habit selection and custom trackable creation.
- Save progress at each step (resume mid-onboarding if interrupted).
- Subtle animations enhance perceived quality.
- Animated background persists consistently across all onboarding screens.
- Keep load times fast between steps.

## How Often Do You Want to Track Mood?

Daily

Multiple Times a Day

Tracking mood once a day provides a general overview, while multiple times per day captures mood changes more precisely.

**You're all set!**

Mood Style: Daily
